REMARKS/ARGUMENTS

This Amendment is filed as a supplement to the Amendment filed August 7, 2003 in response to the May 7, 2003 Office Action. Applicants have added new claims 35-54 to the present case and claims 1-14 and 30-54 are now pending in the present application.

As discussed in the August 7, 2003 Amendment with respect to claims 1-14 and 30-34, the combination of Sherlock, Pelzer and Nakamura fails to teach or suggest a stabilizing rib extending longitudinally along the interior surface of the wall and located radially inward from the channel. Furthermore, this combination of references fails to teach or suggest that the wire used in the toneable conduit is capable of being torn out of the polymeric tube to allow the conduit and wire to be coupled. Wood, Pyramid, Craton, Tzeng and Bird fail to cure the deficiencies of the teachings of Sherlock, Pelzer and Nakamura. Accordingly, it is respectfully submitted that claims 35-54 (like claims 1-14 and 30-34) are patentable over the combination of the references cited by the Examiner in the May 7, 2003 Office Action.

Applicants respectfully submit that all the claims are in condition for allowance. Accordingly, a Notice of Allowance is respectfully requested in due course. If any minor informalities need to be addressed, the Examiner is directed to contact the undersigned attorney by telephone to facilitate prosecution of this case.

It is not believed that extensions of time or fees for net addition of claims are required, beyond those that may otherwise be provided for in documents accompanying this paper. However, in the event that additional extensions of time are necessary to allow consideration of this paper, such extensions are hereby petitioned under 37 CFR § 1.136(a), and any fee required
